The following is an examiner's statement of reasons for allowance: The newly recited patent to Aoshima et al. constitutes the closest prior art. While teaching a recording layer including a first recording film containing Si, Ge, Sn, Mg, In, Zn, Bi or Al and a second recording film containing Cu, this recording layer is not "other than the farthest recording layer from the light transmission layer". The aforementioned limitation requires a more distant recording layer from outermost transparent light transmissive dielectric layer 21 which would function as the required outer light transmission layer. Such an additional recording layer is neither taught nor suggested by the patent to Aoshima et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
